

This TF contains updates to recent disads like India deal, Law of the Sea, Elections, and Columbia FTA. Recent developments like high level dialogue have produced some good uniqueness cards that the India deal could pass in both India and the US. A new internal link card explicitly states that the law of the sea will fail without Bush "political muscle".

This file also includes a new 2NC disad about mortgage bailouts. If you decide to kick politics and the aff made a winners win or concession link turn in the 2AC you can concede that argument (and defense elsewhere) and read this disad that says Bush will push for mortgage bailouts. These bailouts are bad because they hurt market confidence and thus the economy.
